

Mailbox Standards

Cherokee County's Premier Private Lake Community

Nov 2011

The 2010 HOA Board made a decision to change the standards of the materials that the posts are made from. Wood just doesn't hold up over time and the variations in standard sizes is an issue, so we are now requiring the new Polyvinyl Resin (PVR) Post be used when you replace a mailbox post. It looks exactly like wood, but without as many issues associated with wood. There are several already in use within Lake Sovereign.

There is a long lead time to custom build these posts. The HOA purchases a few for emergency purposes. If you need to replace your mailbox post please contact: communications@lakesovereign.net and tell us if you need one immediately or can pre-order for a planned replacement.

You can get a box at Home Depot:

- MFG Brand Name : Gibraltar Building Products
- MFG Part # : EI600B00
- ~ \$24.00

4 in Nail-On Aluminum Black Numbers are also at Home Depot

- MFG Brand Name : The Hillman Group
- Model # : 841630 (example of #7)
- ~\$1.30 each
